Balance Master MK2

Key Features

Colour Contrasted Raised Button

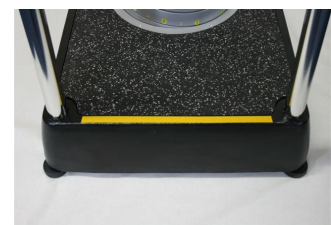

Function labels with Tactile Borders

Adjustment "T" Bar

Colour Contrast strip

Improved Adjustability

- BalanceMaster is designed to improve joint mobility, range of movement, balance and coordination
- The Display has been specifically developed on IFI guidelines with Colour Contrasted Raised Button Function labels in Sentence Case with Tactile Borders
- An Adjustment "T" Bar has been specifically developed for those with limited dexterity or sensory impairment
- A Colour Contrast Strip has been included to clearly identify the leading edge of the base
- The Intermediate Angle Position has been developed to reduce the starting point to 1¼ degrees and to give greater adjustability. The position is identified between the number settings by a milled and tactile dot
