Introduction

This booklet is intended for athletes, coaches, teachers, and parents to:

- Understand what events are available at this year's competition
- Compare Activity Alliance Profiles and Athletics Groupings with World Para Athletics Classes

Classification

The enclosed information is a guide for Activity Alliance events and **is not an WPA Classification**

You can find out further information on classification using the following links:

<https://www.britishathletics.org.uk/get-involved/>

British Athletics Classification will allow athletes to:

- Enter Parallel Success events across UK
- Register times on the British Rankings (www.thepowerof10.info)
- Be eligible for School Games selection
- Receive monthly Paralympic newsletter from British Athletics

For athletes interested in joining an athletics club and seeking a British Classification please contact the Athletics Classification Coordinator on classification@britishathletics.org.uk or 07702 335 861 or visit the [UK Athletics website](#)

The Activity Alliance Profile system is used to create competition for athletes who are not yet involved in classification. You can find out more in our [Profile Toolkit](#)

If you need assistance in deciding a Profile for an athlete, then please email events@activityalliance.org.uk

Intellectually impaired Athletes are eligible if they meet the criteria to compete as an athlete with an Intellectual Impairment. That is, that they have been identified by an agency or professional as having a general Intellectual Impairment or IQ of 75 or below.

Intellectual impairment does not include physical or sensory impairment, emotional or behavioural impairments.

A formal SportExcel UK or Virtus classification is not necessary to enter.

The promoters may refuse entry to any athlete who, in their opinion, does not meet the eligibility criteria.

Physically impaired athletes do not require a formal Para Athletics Classification to compete. Athletes should use the Activity Alliance Profile System to identify which track or field grouping they should compete under.

Visually impaired and Hearing impaired athletes do not need a formal classification

Conditions of entry

Competitors may enter up to 3 individual events to medal and appear as a guest (where they will not medal in as many events as they wish)

The competitions are run using World Para Athletics Classification as the sports competition groupings, with events open wider than the Paralympic programme. Requirements for these sports groupings are given below.

Results and Medals

Photo Finish and Electronic Distance Measuring will be in place for track and field events. Results will be published on the day and all times and distances submitted for rankings (for those with an official classification)

Medals will be awarded by Sex, Age Group and Classification. Where numbers of the same Sex, Age Group and Classification dictate, Heats and Finals may be used in order to decide winners.

Medals will be awarded to First, Second and Third place athletes. In the event of a dead heat or tie, medals may be awarded to two athletes.

Safeguarding

A priority for Activity Alliance is to ensure that everyone can take part in opportunities that are inclusive, safe, enjoyable and protective. We promote the welfare of all children, young people and adults at risk and their rights to be protected from harm

Weights and standards

The document contains information regarding the events available to athletes, the specific weights for throwing implements relevant to the Activity Alliance Field and Age Groups as well as the qualifying standards for the National Junior Para Athletics Championships.

Please note for 2025 no qualifying standards will be implemented to support athlete development. However, we will rely on coaches and teachers to ensure that participants are of a standard and are able to compete at this level.

Our aim is to provide as much information and support as possible so that athletes, regardless of their ability can continue to participate within the sport of athletics. We are committed to delivering multi-disability events that cater for both the needs of the disability community and the relevant NGB pathway for talented athletes.

We would like to take this opportunity to thank the individuals who have contributed to the development of this document and appreciate your continued support of the Activity Alliance.

T37 -14,15	T37	Athlete with cerebral palsy - runner - Hemiplegic – runner functionally affected on one side.
15, (16),18,19,20, (24) 26b,27,28,32	T38	Athlete with cerebral palsy – runner -minimal impairment.
RR1-RR3	RR1	Severe involvement in the lower extremities and trunk and moderate to severe involvement in the upper extremities. Severe difficulty in isolating individual joint movement in the lower extremities. -Poor control of the stride. Foot drag, severe asymmetry, or no alternating leg movements may be seen. May have limited hand and arm function- unilateral or bilateral. May have limited trunk function Severe difficulties in co-ordination of functional RaceRunning movement and body control characterise this class.
	RR2	Moderate involvement in the upper extremities and trunk Moderate to severe involvement in the lower extremities. The stride pattern may be short, asymmetrical, or unilateral but more effective than RR1. Athletes with spasticity would have Grade 2 or 3 on the ASAS in the lower extremities, or Grade 3 in at least 1 lower extremities. Athletes in this class will have: Minimum or no foot drag. Bilateral, alternating, unilateral, and simultaneous leg push will be effective but limited by weakness, range of motion, spasticity or athetosis. Asymmetry, or limited range of motion, poor co-ordination in the lower extremities, fair trunk, and upper extremity control, along with limited stride effectiveness characterise this class.
	RR3	Athletes in this class will have mild to moderate involvement in one or both upper extremities, fair to good trunk control, and moderate involvement in the lower extremities, with the ability to isolate lower extremity movements. The athletes will have:

		Symmetrical or slight asymmetrical or leg movements with good push off. Effective start with good acceleration No Startle reflex. Athletes with spasticity would have grade 1 or 2 on ASAS. Adequate steering and braking with the upper extremities and usually without strapping. Hip and stride contractures may limit stride length. Athletes with Athetosis may show a smoother movement pattern as their speed increases. Asymmetrical or moderate co-ordination difficulties in the lower extremities, moderate to good steering and trunk function in the RaceRunner and effective start with good acceleration characterise this class.
T40/41 - 25	T40-T41	Athlete - runner with dwarfism.
T42 -19, (27)	T42-T44	Athlete – runner has one or more impairment types affecting hip and/or knee function in one or both limbs and with activity limitations jumps and running competing without prosthesis/prostheses
T43 - 18,20		Athlete – runner has bilateral lower limb impairments competing without prostheses where both limbs meet the minimum impairment criteria, and where functional loss is in the feet, ankles and/or lower legs
T44 - 23, (28) (30)		Athlete – runner competing without a prosthesis with a unilateral or a combination of lower limb impairment/s where the impairment in only one limb meets the minimum impairment criteria. Functional loss is seen in one foot, ankle and/or lower leg
T61- 18,20	T61-T64	Athletes with double leg above the knee amputation who compete in running or jumping using prostheses
T62 -18,20		Athletes with double below the knee amputation who compete in running or jumping using prostheses
T63 - 19, (27)		Athletes with single above the knee amputation who compete in running or jumping using a prosthesis
T64 - 23, (28) (30)		Athletes with single below the knee amputation who compete in running or jumping using a prosthesis
T45 - 21, 22, 29	T45-T46	Athlete – runner with double arm amputation or physical impairment allowing similar movement
T46 -16		Athlete – runner with single arm amputation or physical impairment allowing similar movement
T47 - 24	T47	Athlete – runner with single through wrist amputation or physical impairment allowing similar movement
T51 – 1p, 2	T51-T52	Wheelchair racer with mild weakness in shoulders, limited ability in straightening elbows & wrist function. No finger, trunk, or leg function.
T52 – 3,7		Wheelchair racer with good shoulder, elbow & wrist function. Limited finger movement. No leg/trunk function.
T53 - 4,6,9,31	T53-T54	Wheelchair racer with normal arm & hand function but no leg or trunk function.
